List of PHC80-1 Block Statistics Reports	IV	1/A4
TEXT		
Introduction	VII	1/A7
Appendix A Area Classifications	A–1	1/A10
Appendix B Definitions and Explanations of Subject Characteristics	B–1	1/A13
Appendix C General Enumeration and Processing Procedures	C–1	1/B2
Appendix D Accuracy of the Data	D–1	1/B3
Appendix E Facsimiles of Respondent Instructions and Questionnaire Pages	E–1	1/B5
TABLES		
1. Characteristics of Population and Housing Units, for the Blocked Portion of the SMSA: 1980	1	1/B10
The SMSA		
Counties		
Places		
2. Characteristics of Population and Housing Units, by Blocks: 1980	2	1/B11
Blocks Within Census Tracts or Block Numbering Areas (BNA's)		
3. Blocks With Zero Population and Zero Total Housing Units: 1980	18	1/C13

MAPS

Printed maps identifying the geographic areas covered herein are provided in a separate package which can be ordered from the Superintendent of Documents.

An index to 1980 census maps, which includes an SMSA map index to block numbered areas and an index listing identifying each blocked geographic area and its map sheet number(s), accompanies the maps.

INDEX

An index to the location of data by geographic area on each fiche appears in frame G14.

U.S. Department of Commerce
Malcolm Baldrige, Secretary
Joseph R. Wright, Jr., Deputy Secretary
Robert G. Dederick, Assistant Secretary
for Economic Affairs

BUREAU OF THE CENSUS
Bruce Chapman, Director
Daniel B. Levine, Deputy Director

POPULATION DIVISION
Roger A. Herriot, Chief

HOUSING DIVISION
Arthur F. Young, Chief

Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the census-taking process. The Bureau was guided by then Director, **Vincent P. Barabba**, and Deputy Director **Daniel B. Levine**. Primary direction of the census program was performed by **George E. Hall**, then Associate Director for Demographic Fields, assisted by **Earle J. Gerson**, then Assistant Director for Demographic Censuses, in conjunction with **Barbara A. Bailar**, Associate Director for Statistical Standards and Methodology, **Howard N. Hamilton**, Assistant Director for Computer Services, **Shirley Kallek**, Associate Director for Economic Fields, **James D. Lincoln**, Associate Director for Administration, **Rex L. Pullin**, Associate Director for Field Operations, and **W. Bruce Ramsay**, Associate Director for Information Technology. The director's staff was assisted by **Peter A. Bounpane** and **Sherry L. Courtland**.

Responsibility for developing the population portion of the 1980 census questionnaire content and designing the tabulations was in the Population Division, under the supervision of **Meyer Zitter**, then Chief, **Paula J. Schneider**, Staff Assistant for Census Programs, **Roger A. Herriot, Nampeo D. McKenney**, and **Arthur J. Norton**, Assistant Chiefs.

Responsibility for developing the housing portion of the 1980 census questionnaire content, designing the tabulations, and preparing this report was in the Housing Division, under the supervision of **Arthur F. Young**, Chief. This report was planned and written by **William A. Downs**, Chief, Decennial Planning and Data Services Branch, assisted by **Carol A. Comisarow** and **Richard G. Knapp**.

Responsibility for the overall planning, coordinating, and processing of the 1980 census was in the Decennial Census Division under the direction of **Gerald J. Post**, then Acting Chief, assisted by **Marie G. Argana, Rachel F. Brown, Donald R. Dalzell, Leonard Goldberg, Earle B. Knapp, Jr.**, and **Roger O. Lepage**.

Data base and generalized system support was developed and provided by Systems Development Division, **Judy M. Bedell**, Chief, under the direction of **John Jerry Bell**, Assistant Chief.

Computer processing was performed in the Computer Operations Division, **C. Thomas DiNenna**, then Chief, and **John E. Halterman**, Assistant Chief.

The Statistical Methods Division was largely responsible for developing new procedures to obtain a more accurate count of the population. This work was supervised by **Charles D. Jones**, Chief, **David V. Bateman, Susan M. Miskura**, and **Robert T. O'Reagan**, Assistant Chiefs.

Geographic programs and plans were developed in the Geography Division under the direction of **Gerald F. Cranford**, then Assistant Chief, **Robert W. Marx** and **Silla G. Tomasi**, Assistant Chiefs, and **Donald I. Hirschfeld**, Special Assistant. **Joseph J. Knott** coordinated geographic operational phases.

Data collection activities were supervised in the Field Division by **Richard C. Burt**, then Chief, under the direction of **Lawrence T. Love** and **Stanley D. Matchett**, then Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

The coordination and acquisition of automatic data processing equipment were the responsibility of the Automatic Data Processing Planning Staff, **James R. Popal**, Chief, under the direction of **Richard L. Pauly**, Deputy Chief.

The system design, technical specifications, construction, and installation of the FOSDIC and Automated Camera Technology System were the responsibility of Technical Services Division, **McRae Anderson**, Chief, assisted by **Robert E. Joseph**, Assistant Chief.

Questionnaire processing procedures were developed in the Decennial Processing Staff, **James S. Werking**, then Chief, under the direction of **Harry C. O'Haver**, Assistant Chief. The manual processing and microfilming of the questionnaires were performed at three decennial processing locations as follows: Data Preparation Division, **Don L. Adams**, Chief; Jeffersonville Processing Office, **Robert L. Kirkland**, then Processing Manager; New Orleans Processing Office, **Robert L. Allen**, Chief; and Laguna Niguel Processing Office, **Robert N. Scheller**, Chief.

Administrative support was provided by the Administrative Services Division, **O. Bryant Benton**, then Acting Chief.

Publications editing, printing, and composition were performed in the Publications Services Division, **Raymond J. Koski**, Chief, under the direction of **Milton S. Andersen, Arlene C. Duckett**, and **Gerald A. Mann**.

User services were provided by the Data User Services Division under the supervision of **Michael G. Garland**, Chief, and **Marshall L. Turner**, Assistant Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

Library of Congress Cataloging in Publication Data

1980 census of population and housing. Block statistics.

PHC80-1-

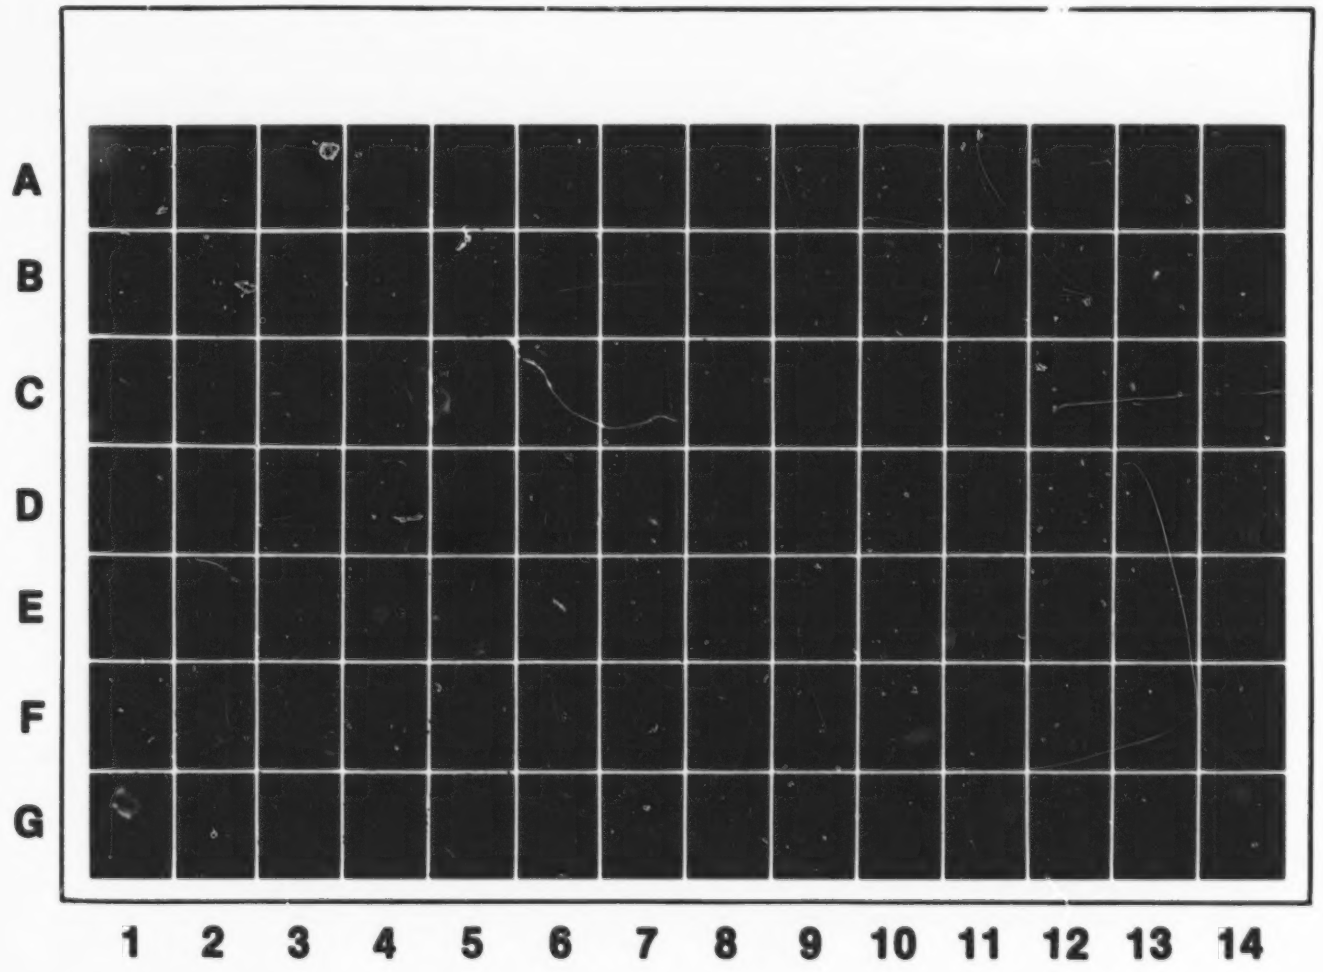
For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by draft on a U.S. bank.

Microfiche Format



This figure shows the layout of the microfiche. It contains 98 frames, arranged in 7 rows (A-G) and 14 columns (1-14). References on the contents and index pages to the locations of parts of the report are by row and column numbers; e.g., frame C9 is at the intersection of row C and column 9.

Some reports occupy more than one microfiche; this will be indicated in the identifying information at the top of each microfiche (e.g., 1 of 3). References on the contents and index pages show the number of the microfiche immediately preceding the row and column designation; e.g., 1/C9.

The United States Summary report is a geographic index to the other reports. The State and Puerto Rico reports present data and maps for the portions outside Standard Metropolitan Statistical Areas within the State (or State equivalent).

Introduction

GENERAL. VII
CONTENTS OF THE REPORT . . . VII
SYMBOLS AND GEOGRAPHIC ABBREVIATIONS VIII
MAPS AND BLOCK IDENTIFICATION VIII

GENERAL

This report presents statistics from the 1980 Census of Population and Housing, by block, on general characteristics of housing units and population. Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The 1980 census figures presented here may differ from those shown in the *Advance Reports,* PHC80-V, and in the Public Law 94-171 redistricting data products. The changes reflect corre ions of errors found after the PHC80-V reports and P.L. 94-171 materials were prepared. The changes may affect any geographic area shown in this report.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to any appreciable extent the comparability of the 1980 data and the 1970 data shown in this report.

The abbreviated identification for this report is PHC80-1 (i.e., Population and Housing Census, 1980, Volume 1) followed by a number representing the area which the report covers. The PHC80-1 series consists of individual reports for States, Puerto Rico, and standard metropolitan statistical areas (SMSA's), as listed on pages IV-VI. Report No. 1, U.S. Summary, does not present block data, but rather is a geographic index to the other reports in this series. Reports numbered 2 through 53 (except number 10) relate to the 50 States and Puerto Rico, and present block data for selected areas *outside* SMSA's within the particular State and Puerto Rico. No reports will be issued with the numbers 10, 54, 55, 56, and 57; these numbers are included to maintain continuity with the 1980 census standard report numbering system. Reports with numbers 58 through 380 relate to the SMSA's recognized for the 1980 census and present block data for selected areas within the particular SMSA.

The selected areas for which 1980 census block data are shown in this series of reports were determined in the following manner. After considerable study and discussion during the planning of the 1980 census, the Census Bureau concluded that block statistics would be collected for (1) urbanized areas (UA's), including certain potential UA's; (2) incorporated places of 10,000 or more inhabitants outside UA's (an expansion over 1970, included mainly to meet State and local legislative redistricting needs); (3) areas choosing to participate in the Bureau's contract block statistics program, as in previous censuses.

Block statistics can be presented only where blocks have been delineated and numbered well in advance of the census enumeration. For areas included as part of the urbanized area program, the Census Bureau defined block numbers in the territory which appeared even remotely likely to be defined as urbanized when the final boundaries were drawn. Therefore, block data are available in most cases for territory beyond the boundaries of an urbanized area. The block data for areas that qualified as SMSA's as a result of the 1980 census are shown in the appropriate SMSA report. Block data for areas that did not qualify as SMSA's are shown in the appropriate State report.

The determination as to the places (outside urbanized areas) for which block statistics would be collected was made on the basis of the 1970 census figures and official Census Bureau population estimates for the late 1970's. Therefore, data are presented in this series of reports for some places with 1980 populations of less than 10,000; on the other hand, some places with a 1980 population of 10,000 or more are not shown because prior to 1980, the Census Bureau's population estimate for the place was not 10,000 or more. Places inside SMSA's appear in the appropriate SMSA report. All other places appear in the appropriate State report.

Block statistics are also shown for contract block areas. These are areas for which a local sponsor paid the Census Bureau for the cost of identifying, tabulating, and presenting data by block. Block data for contract areas in SMSA's are published in the appropriate SMSA report. Block data for contract areas outside SMSA's are published in the appropriate State report.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in subsequent reports of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and five appendixes), a table of contents, and three detailed tables. Also available are detailed maps and a map index showing the blocks covered by this report.

Tables 1 and 2 show data on identical population and housing characteristics; however, the geographic level of presentation differs. Table 1 presents totals for the SMSA's (as applicable), counties, and

places. For those areas which are partially block numbered, table 1 provides two sets of totals, one for the area in its entirety and a second for the blocked portion of the area.

Table 2 repeats the names of the areas shown in table 1, but presents data only for the component tracts or block numbering areas (BNA's) and the blocks within each tract or BNA. This table is arranged so that the county name appears in the upper right corner of the page and the listing for each county starts on a new page. The component tracts/BNA's are listed in numerical order within the particular county subdivision (where present), place, or remainder of county or county subdivision. For tracts that are only partially blocked, two sets of totals are provided, one for the tract in its entirety and a second for the blocked portion of the tract. Within each tract/BNA, the blocks are listed in numerical order. For tracts/BNA's or blocks which are split by the boundaries of county subdivisions and/or places, the appropriate portion is shown within the particular area, with the symbol "p" following the tract/BNA or block number in each instance.

The housing data in table 2 (as in table 1) refer to year-round housing units. Any block in table 2 shown as having zero housing units is one of the following: If it has zero population, the block consists solely of vacant seasonal units; if it has one or more persons, the block contains group quarters (and may also contain vacant seasonal housing units). Table 2 excludes blocks with no population and no housing units of any kind; these blocks are listed in table 3.

Table 3 follows the same geographic order as the other tables, but it is limited to those blocks which have a zero population count and a zero total housing unit count. Therefore, county subdivisions, places, or tracts/BNA's do not appear in this table if their blocked portions contained no zero blocks. This table has been provided as an aid to data users so that all blocks appearing on the maps accompanying this report are listed in either table 2 or table 3 of this report.

The geographic order of presentation, which is the same in all three tables of this report, utilizes the county or county equivalent as the primary element. For the area covered by the report, the counties or county equivalents are listed in alphabetical order, followed by any independent cities, also in alphabetical order. Within the county (except as noted below), the blocked places are then listed in alphabetical order, followed by the residual category "Remainder of county," if necessary.

For this series of reports, data summaries are presented at the MCD level for 20 States which have minor civil divisions (MCD's)—e.g., townships—with functioning governments. These States are Connecticut, Illinois, Indiana, Kansas, Maine, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, and Wisconsin. Thus, in the PHC80-1 reports that contain data for portions of any of these 20 States, the MCD's containing blocks within the particular county are listed in alphabetical order, with any component places listed alphabetically within each MCD. As necessary, a residual category (e.g., "remainder of township") is also shown for the MCD. For places which are split between two or more counties (or MCD's), each portion is shown within the appropriate county (or MCD), with "(pt.)" following the place name.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

- A dash "–" represents zero or a percent which rounds to less than 0.1
- Three dots "..." mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals.
- A "p" next to a tract/BNA or block number indicates a tract/BNA or block number split by the boundary of a place and/or minor civil division.
- A "(pt.)" next to a place name indicates a place that is split by a county and/or MCD boundary.
- An asterisk "*" next to the total population figure indicates that the population in that particular tract or block includes persons living in group quarters, i.e., persons who do not live in housing units.
- A dagger "†" next to a geographic designation for an area indicates that 20 percent or more of the total persons (for the population characteristics) or housing units (for the housing characteristics) were substituted for the area. For a discussion of the substitution procedures, see allocation procedures in Appendix D, Accuracy of the Data, in *1980 Census of Population, General Population Characteristics,* PC80-1-B, or *1980 Census of Housing, General Housing Characteristics,* HC80-1-A.
- CDP is census designated place
- (unorg.) is unorganized territory
- SMSA is standard metropolitan statistical area

MAPS AND BLOCK IDENTIFICATION

Maps

Available with each report is a map package which contains a set of maps showing the boundary and number of each census tract or BNA, and within it the location and number of each block, for the area(s) covered by the particular report. The SMSA report map package includes a Map Index to Block Numbered Areas which shows the boundary of the entire SMSA, the extent of the blocked areas, and the map identification numbers for maps covering these areas.

Index to Block Numbered 1980 Census Maps

Available with each report is a geographic map index leaflet which consists of a map legend describing symbols shown on the maps, an explanation of the map numbering system, a listing of the filing sequence of the maps, and an index listing that identifies each blocked geographic area and its map sheet number(s). SMSA report indexes include sections of the State Map Index to Block Numbered Areas identifying portions of the State that are adjacent to the SMSA. Selected area report indexes contain all sections of the State Map Index to Block Numbered Areas.

Block Identification

In block numbered areas, a block number was assigned to each block on a map prior

to the 1980 census. In some instances, the map may have been several years old and did not recognize construction of new streets or the nonexistence of others. Hence, the published map may not reflect the blocks as they existed "on the ground" at the time of the enumeration. For example, a block as shown on the map may in reality be divided into two blocks. Under this circumstance, the housing units in two blocks would be assigned to the one block shown on the map even though two blocks existed at the time of enumeration. On the other hand, a street shown on the map as the boundary between two blocks may not exist; in that circumstance, each housing unit was identified as being physically located in the appropriate one of the two blocks and assigned its respective block number, even though only one physical block existed at the time of enumeration.

Block numbers are assigned uniquely within each census tract or BNA. Generally the blocks in each tract or BNA are numbered beginning with 101. However, block numbers are not always consecutive. In some cases, a place or other political boundary divides a block. The data shown are for the block, or portion of the block, represented by the land area as bounded and numbered on the block map.

COUNTIES

In most States, the primary divisions are termed counties. In Louisiana, these divisions are known as parishes. In Alaska, which has no counties, the county equivalents are the organized boroughs together with the "census areas" which were developed for general statistical purposes by the State of Alaska and the Census Bureau. In four States (Maryland, Missouri, Nevada, and Virginia), there are one or more cities which are independent of any county organization and thus constitute primary divisions of their States. The part of Yellowstone National Park in Montana is treated as a county equivalent. The District of Columbia, has no primary divisions, and the entire area is considered equivalent to a county for census purposes.

COUNTY SUBDIVISIONS

Statistics for subdivisions of counties or equivalent areas are presented as follows:

1. Minor civil divisions (MCD's) in 29 States. In 20 States, all or many MCD's are functioning general-purpose governments. The States are Connecticut, Illinois, Indiana, Kansas, Maine, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, and Wisconsin. (In 1970, the county subdivisions recognized for North Dakota were census county divisions.) In nine States, Arkansas, Iowa, Louisiana, Maryland, Mississippi, Nevada, North Carolina, Virginia, and West Virginia, MCD's are legally established, but have no or very little governmental functions. The tables in this report recognize only the MCD's in the 20 States with functioning MCD's.

   MCD's are primary divisions of counties established under State law. These MCD's are variously designated as townships, towns, precincts, districts, wards, plantations, Indian reservations, grants, purchases, gores, locations, or areas. In some States, all incorporated places are also MCD's in their own right. In other States, incorporated places are subordinate to or part of the MCD(s) in which they are located, or the pattern is mixed—some incorporated places are independent MCD's and others are subordinate to one or more MCD's.

   In eight States (Arkansas, Iowa, Kansas, Maine, Minnesota, North Carolina, North Dakota, and South Dakota), certain counties contain territory not included in an MCD recognized by the Bureau. Each separate area of unorganized territory in these States is recognized as one or more subdivisions and given a name by the Bureau; the name is followed by the designation "(unorg.)."

2. Census county divisions (CCD's) in 20 States. The States are Alabama, Arizona, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Kentucky, Montana, New Mexico, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Washington, and Wyoming.

   CCD's are geographic areas which have been defined by the Census Bureau in cooperation with State and county officials for the purpose of presenting statistical data. CCD's have been defined in States where there are no legally established MCD's, where the boundaries of MCD's change frequently, and/or where the MCD's are not generally known to the public. Using published guidelines, the CCD's have usually been designed to represent community areas focused on trading centers or to represent major land use areas, and to have visible, permanent, and easily described boundaries. In this report, block data are not provided for census county divisions.

3. Census subareas in Alaska. For the 1980 census, census subareas have been delineated cooperatively by the Census Bureau and the State of Alaska for statistical purposes. These areas replace the subdivisions used for the 1970 census. Data for blocks for census subareas in Alaska are not shown in the tables of this report.

4. Quadrants in the District of Columbia.

PLACES

Two types of places are recognized in the census reports—incorporated places and census designated places—as defined below.

Incorporated Places

Incorporated places recognized in the reports of the census are places which are incorporated under the laws of their respective States as cities, boroughs,

towns, and villages, with the following exceptions: boroughs in Alaska and New York and towns in the six New England States, New York, and Wisconsin. The towns in the New England States, New York, and Wisconsin, and the boroughs in New York are recognized as MCD's for census purposes; the boroughs in Alaska are county equivalents.

Census Designated Places

As in the 1950, 1960, and 1970 censuses, the Census Bureau has delineated boundaries for closely settled population centers without corporate limits. In 1980, the name of each such place is followed by "(CDP)," meaning "census designated place." In the 1970 and earlier censuses these places were identified by "(U)," meaning "unincorporated place." To be recognized for the 1980 census, CDP's must have a minimum 1980 population as follows:

Area	Minimum CDP population
Alaska	25
Hawaii	300
All other States:	
Inside urbanized areas:	
With one or more cities of 50,000 or more	5,000
With no city of 50,000 or more	1,000
Outside urbanized areas	1,000

Hawaii is the only State with no incorporated places recognized by the Bureau of the Census. All places shown for Hawaii in the 1980 census reports are CDP's. Honolulu CDP essentially represents the Honolulu Judicial District. The city of Honolulu, coextensive with the county of Honolulu, is not recognized for census purposes.

Census designated place boundaries change with changes in the settlement pattern; a place which has the same name as in previous censuses does not necessarily have the same boundaries. Boundary outlines for CDP's appear on the county subdivision map. Detailed maps are available for purchase from the Census Bureau.

URBANIZED AREAS

The major objective of the Census Bureau in delineating urbanized areas is to provide a better separation of urban and rural population in the vicinity of large cities. An urbanized area consists of a central city or cities, and surrounding closely settled territory ("urban fringe").

The following criteria are used in determining the eligibility and definition of the 1980 urbanized areas.[1] An urbanized area comprises an incorporated place[2] and adjacent densely settled surrounding area that together have a minimum population of 50,000.[3] The densely settled surrounding area consists of:

1. Contiguous incorporated places or census designated places having:
   a. A population of 2,500 or more; or,
   b. A population of less than 2,500 but having either a population density of 1,000 persons per square mile, closely settled area containing a minimum of 50 percent of the population, or a cluster of at least 100 housing units.
2. Contiguous unincorporated area which is connected by road and has a population density of at least 1,000 persons per square mile.[4]
3. Other contiguous unincorporated area with a density of less than 1,000 persons per square mile, provided that it:
   a. Eliminates an enclave of less than 5 square miles which is surrounded by built-up area.
   b. Closes an indentation in the boundary of the densely settled area that is no more than 1 mile across the open end and encompasses no more than 5 square miles.
   c. Links an outlying area of qualifying density, provided that the outlying area is:
      (1) Connected by road to, and is not more than 1 1/2 miles from, the main body of the urbanized area.
      (2) Separated from the main body of the urbanized area by water or other undevelopable area, is connected by road to the main body of the urbanized area, and is not more than 5 miles from the main body of the urbanized area.
4. Large concentrations of nonresidential urban area (such as industrial parks, office areas, and major airports) which have at least one-quarter of their boundary contiguous to an urbanized area.

[1] All references to population counts and densities relate to data from the 1980 census.

[2] In Hawaii, incorporated places do not exist in the sense of functioning local governmental units. Instead, census designated places are used in defining a central city and for applying urbanized area criteria.

[3] The rural portions of extended cities, as defined in the Census Bureau's extended city criteria, are excluded from the urbanized area. In addition, for an urbanized area to be recognized, it must include a population of at least 25,000 that does not reside on a military base.

[4] Any area of extensive nonresidential urban land use, such as railroad yards, airports, factories, parks, golf courses, and cemeteries, is excluded in computing the population density.

STANDARD METROPOLITAN STATISTICAL AREAS

Definition

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. The standard metropolitan statistical area (SMSA) classification is a statistical standard, developed for use by Federal agencies in the production, analysis, and publication of data on metropolitan areas. The SMSA's are designated and defined by the Office of Management and Budget, following a set of official published standards developed by the interagency Federal Committee on Standard Metropolitan Statistical Areas.

Each SMSA has one or more central counties containing the area's main population concentration: an urbanized area with at least 50,000 inhabitants. An SMSA may also include outlying counties which have close economic and social relationships with the central counties. The outlying counties must have a specified level of commuting to the central counties and must also meet certain standards regarding metropolitan character, such as population density, urban

population, and population growth. In New England, SMSA's are composed of cities and towns rather than whole counties.

SMSA Titles

Most SMSA's have at least one central city. The titles of SMSA's include up to three city names, as well as the name of each State into which the SMSA extends. For the 1980 census, central cities of SMSA's are those named in the titles of the SMSA's, with the exception of Nassau-Suffolk, N.Y., which has no central city, and Northeast Pennsylvania, the central cities of which are Scranton, Wilkes-Barre, and Hazleton. Data on central cities of SMSA's include the entire population within the legal city boundaries. In Hawaii, where there are no incorporated places recognized by the Bureau of the Census, census designated places are recognized as central cities.

New SMSA Standards

New standards for designating and defining metropolitan statistical areas were published in the *Federal Register* on January 3, 1980. The SMSA's recognized for the 1980 census comprise (1) all areas as defined on January 1, 1980, except for one area which was defined provisionally during the 1970's on the basis of population estimates but whose qualification was not confirmed by 1980 census counts; and (2) a group of 36 new areas defined on the basis of 1980 census counts and the new standards that were published on January 3, 1980.

The new standards will not be applied to the areas existing on January 1, 1980, until after data on commuting flows become available from 1980 census tabulations. At that time, the boundaries, definitions, and titles for all SMSA's will be reviewed.

To aid users who want to become familiar with the SMSA standards and how they are applied, documents are available from the Office of Management and Budget, Washington, D.C. 20503.

CENSUS TRACTS

Census tracts are small areas into which large cities and adjacent areas are divided for statistical purposes. For 1980, all counties containing census tracts are tracted in their entirety. Census tract boundaries were determined by a local committee, subject to review and approval by the Census Bureau. Tracts are generally designed to be relatively homogeneous with respect to population characteristics, economic status, and living conditions, and to contain a population averaging about 4,000 residents. Tract boundaries are established with the intention of being maintained over a long period of time so that comparisons may be made from census to census.

BLOCK NUMBERING AREAS

In untracted areas, block data are reported within block numbering areas (BNA's). They are established by arbitrarily dividing a blocked area along major streets, railroads, and other physical boundaries to facilitate the numbering of blocks and the reporting of block data. The boundaries of block numbering areas have no statistical significance, but are for convenience in mapping and in the tabulation and presentation of block data.

BLOCKS

A block is usually a well-defined rectangular piece of land bounded by streets or roads. However, it may be irregular in shape, and may be bounded by physical features such as railroad tracks or streams. Blocks by definition do not cross the boundaries of counties, tracts, or block numbering areas. Blocks may cross place boundaries and the boundaries of county subdivisions. A block, for census purposes, is the specific numbered area as it is shown on the map(s) included with the block statistics reports.

Self-Enumeration and Census Questionnaire—The 1980 census was conducted primarily through self-enumeration. The principal determinant for the responses was, therefore, the questionnaire and its accompanying instruction guide. Furthermore, census takers were instructed in their telephone and personal visit interviews to read the questions directly from the questionnaire. The definitions and explanations given below for each subject are drawn largely from various technical and procedural materials used in the collection of the data. This material helped the census interviewers to understand more fully the intent of each question, and thus to resolve problems or unusual cases in a manner consistent with this intent. Also included is certain explanatory information to assist the reader in the proper utilization of the statistics. The questionnaire pages containing the 100-percent population and housing questions used to produce the data in this report, and the pages of the instruction guide which relate to these questions, are reproduced in appendix E.

Comparability with 1970 Data—Although the 1980 data are generally comparable with 1970 data, certain changes were introduced for 1980. The part of the 1970 housing unit definition requiring a unit to have either direct access or complete kitchen facilities was modified slightly. For 1980, the complete kitchen facilities alternative was dropped and direct access was required of all units. In 1970, vacant mobile homes were not counted as housing units; for 1980, they are included in the housing inventory if they are intended for occupancy on the site where they stand. In 1970, a unit where 6 or more unrelated persons were living together was classified as a group quarters; for 1980, that requirement was raised to 10 or more unrelated persons. The 1970 classification "lacking some or all plumbing facilities" was based on three separate inquiries regarding piped water, bathtub or shower, and toilet facilities. These three inquiries were consolidated into a single question on complete plumbing facilities in 1980. In addition, the facilities must be inside the housing unit rather than inside the structure as in 1970.

The tabulations on value and contract rent refer to the same sets of housing units in 1980 as in 1970. In general, the data exclude units on properties of 10 or more acres and owner-occupied units with a commercial establishment or medical office on the property.

Total Population—Total population is the count of all persons living in the geographic area, including those in group quarters.

Race—The data on race were derived from answers to question 4. The 1980 census counts of the population by race in 100-percent tabulations, including data in this report, are provisional; i.e., the counts are not final. Final data on race will be determined after sample processing. The sample data will appear in *Characteristics of Housing Units, Detailed Housing Characteristics,* HC80-1-B; and *Characteristics of the Population, General Social and Economic Characteristics,* PC80-1-C. The concept of race as used by the Census Bureau is based on self-identification and does not denote any clear-cut scientific definition of biological stock. Since the 1980 census obtained information on race through self-enumeration, the data represent self-classification by people according to the race with which they identify. In this report, two categories are shown: "Black" and "Asian and Pacific Islander." The latter consists of persons reported as Japanese, Chinese, Filipino, Korean, Vietnamese, Asian Indian, Hawaiian, Guamanian, or Samoan.

Spanish Origin—The data on Spanish origin were derived from answers to question 7, on Spanish/Hispanic origin or descent. The data on Spanish origin are provisional; i.e., the counts are not final. Final data on Spanish origin will be determined after sample processing. The sample data will appear in *Characteristics of Housing Units, Detailed Housing Characteristics,* HC80-1-B; and *Characteristics of the Population, General Social and Economic Characteristics,* PC80-1-C. Persons of Spanish/Hispanic origin or descent are those who classified themselves in one of the specific Spanish origin categories listed on the questionnaire—Mexican, Puerto Rican, or Cuban—as well as those who indicated that they

were of other Spanish/Hispanic origin. Persons of Spanish/Hispanic origin may be of any race.

Age—The age classification is based on the age of the person in completed years as of April 1, 1980, and was determined from the reply to question 5, age and month and year of birth. The age categories shown in this report are for persons under 18 years and those 65 years and over.

Living Quarters—All living quarters are classified in the census as either group quarters or housing units. Usually, living quarters are in structures intended for residential use (e.g., a one-family home, apartment house, hotel or motel, boarding house, mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (e.g., the rooms in a warehouse where a watchman lives), as well as in tents, boats, etc.

Group Quarters—All persons not living in housing units are classified as being in group quarters. There are two types of group quarters: (1) institutional group quarters, and (2) noninstitutional group quarters. Institutional group quarters are living quarters occupied by one or more persons under care or custody, such as children in an orphanage, persons in a nursing home and prisoners in a penitentiary. Noninstitutional group quarters include living quarters such as college owned and/or operated dormitories, fraternity and sorority houses, nurses' dormitories, military barracks, and any living quarters which are occupied by 9 or more persons unrelated to the person listed in column 1 on the questionnaire, or 10 or more unrelated persons who share the unit. If there is any group quarters population in a tract or block, it will be indicated by an asterisk "*" next to the total population figure.

Housing Units—A housing unit is a house, an apartment, or a group of rooms, or a single room occupied as a separate living quarters, or if vacant, intended for occupancy as a separate living quarters. Separate living quarters are those in which the occupants live and eat separately from the other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the paragraph on group quarters). Both occupied and vacant housing units are included in the housing inventory except that tents, caves, boats, vans, and the like are included only if they are occupied. Vacant mobile homes are included provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealers' sales lots, at the factory, or in storage yards are excluded from the housing inventory.

Occupied Housing Units—A housing unit is classified as occupied if a person or group of persons is living in it at the time of enumeration or if the occupants are only temporarily absent, for example, on vacation. However, if all the persons staying in the unit have their usual place of residence elsewhere, the unit is classified as vacant.

A count of vacant year-round units may be derived by subtracting the sum of owner/renter-occupied units from the total number of year-round units. The count of vacant year-round units thus obtained included units for sale or rent, units sold or rented but not yet occupied by the new owner or renter, units held for the occasional use of the owner, units held off the market for other reasons, and units occupied by persons with their usual residence elsewhere.

Household—A household includes all the persons who occupy a housing unit. In 100-percent tabulations, the count of households by definition equals the number of occupied housing units.

Tenure—A housing unit is "owner occupied" if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. All other occupied units are classified as "renter occupied," including units rented for cash rent and those occupied without payment of cash rent.

Year-Round Housing Units—Data on housing characteristics in the 1980 census reports are limited to year-round housing units; i.e., all occupied units plus vacant units intended for year-round use. Vacant units intended for seasonal occupancy and vacant units held for migratory labor are excluded because of the difficulty of obtaining characteristics data for them. In this report, the housing unit counts are limited to year-round units. Counts of the total housing inventory, however, are given for census tracts in *Census Tracts,* PHC80-2, and for States, counties, and cities in *General Housing Characteristics,* HC80-1-A, and *Detailed Housing Characteristics,* HC80-1-B.

Units at Address—Statistics on the number of housing units at an address are based on responses to question H4, and are presented in terms of 1 unit and 10 or more units at an address. Since some multi-unit buildings have more than one address and respondent's interpretations of units at an address tend to vary, the counts for 10 or more units at an address may be understated in certain blocks. This item includes both occupied and vacant units at the particular address. (On the long-form sample questionnaire, question H13, "units in structure," presents data on the number of housing units in structures of specified size.)

Persons Per Unit—"Persons per unit" is computed by dividing the population living in housing units by the number of occupied housing units.

Rooms—Rooms to be counted include whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, family rooms, etc. Not counted as rooms are bathrooms, porches, balconies, foyers, halls, half-rooms, kitchenettes, strip or pullman kitchens, utility rooms, unfinished attics, unfinished basements, or other space used for storage or business.

Mean rooms, as shown in the tables, is computed by dividing the sum of the rooms found in each category of owner/renter-occupied housing units by the total number of owner/renter-occupied units. The questionnaire contained a terminal category of "9 or more rooms." For purposes of the computation, the terminal category was given a mean value of 10. As a result, 10 rooms is the arbitrary maximum mean which could be obtained for any area.

Persons Per Room—"Persons per room" is computed by dividing the number of

persons in the unit by the number of rooms in the unit on a household by household basis. The category "1.01 or more persons per room" indicates an average of more than one person to a room. The figures are shown separately for all occupied units and for renter-occupied units.

One-Person Households—One person living alone in a housing unit is a "one-person household."

Householder—One person in each household is designated as the "householder." In most cases, this is the person, or one of the persons, in whose name the home is owned or rented and who is listed in column 1 of the questionnaire. If there is no such person in the household, any adult household member could be designated as the "householder."

Two types of householders are distinguished: a family householder and a nonfamily householder. A family householder is a householder living with one or more persons related to him or her by birth, marriage, or adoption. The householder and all persons in the household related to him or her are family members. A nonfamily householder is a householder living alone or with nonrelatives only.

Family Householder, No Spouse Present, Persons Under 18—Housing units are occupied by either family or nonfamily households. A family is two or more persons related by blood, marriage, or adoption. The figures presented here are for family households where at least one of the members is under 18 years of age and the householder does not have a spouse living in the household.

Lacking Complete Plumbing for Exclusive Use—A housing unit is classified as "lacking complete plumbing for exclusive use" when it does not have all three specified plumbing facilities (hot and cold piped water, a flush toilet, and a bathtub or shower) inside the unit for the exclusive use of the occupants of the unit.

Mean Value—Value is the respondent's estimate of how much the property (house and lot) or condominium unit would sell for if it were for sale. Value data are presented for specified owner-occupied units, which are limited to owner-occupied one-family houses on less than 10 acres, without a commercial establishment or medical office on the property. Mobile homes, trailers, boats, tents, or vans occupied as a usual residence are also excluded from the value tabulations. Value was also collected for condominium units but such units are excluded from the mean value shown in this report.

The mean value was computed by dividing the sum of the values by the number of owner-occupied units for which value is shown. Value was reported in class intervals, the lowest and highest intervals being "Less than $10,000" and "$200,000 or more," respectively. For the purposes of the computation, the midpoints of the intervals were used except that an arbitrary mean of $7,500 was assigned for values less than $10,000, and an arbitrary mean of $250,000 was assigned for values of $200,000 or more. As a result, $7,500 is the arbitrary minimum and $250,000 is the arbitrary maximum mean which could be obtained for any area. Mean value is rounded to the nearest hundred dollars.

Mean Contract Rent—Contract rent is the monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Specified renters include all renter-occupied units except one-family homes on a property of 10 acres or more. The mean contract rent was computed by dividing the sum of the rental amounts by the number of renter-occupied units for which cash rent was paid; units for which no cash rent was paid were excluded from the computation.

Contract rent was reported in class intervals, the lowest and highest intervals being "Less than $50" and "$500 or more," respectively. For purposes of the computation, the midpoints of the intervals were used except that a mean of $35 was assigned for rents less than $50 and a mean of $550 was assigned for rents of $500 or more. As a result, $35 is the arbitrary minimum and $550 is the arbitrary maximum mean which could be obtained for any block. Mean contract rent is rounded to the nearest dollar.

Appendix C.—General Enumeration and Processing Procedures

DATA COLLECTION PROCEDURES

The 1980 census was conducted primarily through self-enumeration. A census questionnaire was delivered by postal carriers to every household several days before Census Day, April 1, 1980. This questionnaire included explanatory information about the form and was accompanied by an instruction guide. Spanish-language versions of the questionnaire and instruction guide were available upon request. The questionnaire was also available in narrative translation in 32 languages.

In most areas of the United States, altogether containing about 95 percent of the population, the householder was requested to fill out and mail back the questionnaire on Census Day. Approximately 83 percent of these households returned their forms by mail. Households that did not mail back a form were visited by an enumerator. Households that returned a form with incomplete or inconsistent information that exceeded a specified tolerance were contacted by telephone or, if necessary, by a personal visit, to obtain the information.

In the remaining (mostly sparsely settled) areas of the country, which contained about 5 percent of the population, the household received a questionnaire in the mail. The householder was requested to fill out the questionnaire and give it to the enumerator when he or she visited the household; incomplete and unfilled forms were completed by interview during the enumerator's visit.

Each household in the country received one of two versions of the census questionnaire: a short-form questionnaire containing a limited number of basic population and housing questions or a long-form questionnaire containing these basic questions as well as a number of additional questions. A sampling procedure was used to determine those households which were to receive the long-form questionnaire. Two sampling rates were employed. For most of the country, one in every six households (about 17 percent) received the long-form or sample questionnaire; in areas estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data in small areas. Special questionnaires were used for the enumeration of persons in group quarters such as colleges and universities, hospitals, prisons, military installations, and ships. These forms contained the same population questions that appeared on either the short form or the long form, but did not include any housing questions. In addition the subjects covered in this report are those derived from responses to the "basic census questions," i.e., those which were collected on a 100-percent basis.

PROCESSING PROCEDURES

The 1980 census questionnaires were processed in a manner similar to that used for the 1970 and 1960 censuses. They were designed to be processed electronically by the Film Optical Sensing Device for Input to Computer (FOSDIC). For most items on the questionnaire, the information supplied by the respondent or obtained by the enumerator was indicated by marking the answers in predesignated positions that would be "read" by FOSDIC from a microfilm copy of the questionnaire and transferred onto computer tape with no intervening manual processing. The computer tape excluded information on individual names and addresses.

The tape containing the information from the questionnaires was processed on the Census Bureau's computers through a number of editing and tabulation steps. Among the products of this operation were computer tapes from which the tables in this report (and most others in the 1980 census publications) were prepared on phototypesetting equipment at the Government Printing Office.

A more detailed description of the data collection and processing procedures can be obtained from the *1980 Census of Population and Housing, Users' Guide,* PHC80-R1.

Appendix D.—Accuracy of the Data

EVALUATION

Since 1980 population and housing counts shown in this report were tabulated from the entries for persons and housing units on all questionnaires, these counts are not subject to sampling error. In any large-scale statistical operation such as a decennial census, human and mechanical errors do occur. These errors are commonly referred to as nonsampling errors. Such errors include failure to enumerate every housing unit or person in the population, not obtaining all required information from respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. Errors can also occur during the field review of the enumerators' work, the clerical handling of the census questionnaires, and the electronic processing of the questionnaires.

In an attempt to reduce various types of nonsampling error in the 1980 census, a number of techniques were introduced on the basis of experience in previous censuses and in tests conducted prior to the census. These quality control and review measures were utilized throughout the data collection and processing phases of the census to minimize undercoverage of the population and housing units and to keep the errors at a minimum. As was done for the 1950, 1960, and 1970 censuses, there were programs after the 1980 census to measure various aspects of the quality achieved in the 1980 census. Reports on many aspects of the 1980 census evaluation program will be published as soon as the appropriate data are accumulated and analyzed.

A major component of the evaluation work is to ascertain, insofar as possible, the degree of completeness of the count of persons and housing units. The Census Bureau has estimated that the 1970 census did not count 2.5 percent of the population. For 1980, the Census Bureau's extensive evaluation program will encompass a number of different approaches to the task of estimating the coverage of the census. Although these studies have not been completed at the time of publication of this report, preliminary estimates indicate that the rate of undercoverage in the 1980 census was reduced from 1970 census levels.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions to make sure that its published data do not disclose information about particular individuals and housing units. To accomplish this, the Bureau suppresses data for some characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression may take place.

The general rules of primary suppression are as follows: Counts of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 15 or more persons in the geographic area; counts of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are five or more year-round housing units in the geographic area; characteristics of families, households, or occupied housing units are shown only if there are at least five occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least five and the number of renters is also at least five. These primary suppression criteria are applied independently of one another.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) are subject to an additional level of scrutiny. This level requires that the 15-person or 5-housing-unit criteria stated above be applied to each race of Spanish origin category individually.

In some cases, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction. For example, in tables where the primary suppression criteria result in the suppression of data for a particular race group, data for another race group may have to be suppressed to avoid derivation, by subtraction, of the totals for the race group suppressed on the basis of the primary rules. Similarly, housing unit data shown by tenure may require complementary suppression when the number of owner-occupied or renter-occupied housing units is less than 5. Housing unit data shown by race or Spanish origin of the householder may also require complementary suppression for the reason stated above.

EDITING

The objective of the processing operation is to produce a set of statistics that describes the Nation's population and housing as accurately and clearly as possible. To meet this objective, the responses on each questionnaire went through an editing process. When a questionnaire was encountered that contained only partial or incomplete person or housing unit data, the questionnaire was corrected, in most cases, by an allocation procedure.

For housing data, the allocation was based on related information reported for the housing unit or on information for a similar unit in the immediate vicinity. For example, if tenure for an occupied unit was omitted but a rental amount was reported, the computer automatically edited tenure to "rented for cash rent."

The allocation procedure for population items was to assign an entry that was consistent with entries for other persons with similar characteristics. For example, a person who was reported as a 20 year old son of the householder, but for whom marital status was not reported, was assigned the same marital status as that of the last son processed in the same age group.

A substitution procedure was also employed in the editing process. Substitution is the assignment of a full set of characteristics for a person or housing unit. Substitutions occurred when persons or housing units were known to be present but where no data were available, usually because of non-interview or failure to be microfilmed.

Specific tolerances were established for the number of computer allocations and substitutions that would be permitted for a small area without review of the questionnaires. If the number was outside the tolerance, the questionnaires in which the errors occurred were clerically reviewed and repaired and the questionnaires were recycled through the data capture process.

A table presenting the number of allocations and substitutions for places of 2,500 or more inhabitants, counties, and States may be found in the *General Population Characteristics,* PC80-1-B, and *General Housing Characteristics,* HC80-1-A.

Appendix E.—Facsimiles of Respondent Instructions and Questionnaire Pages

INSTRUCTIONS FOR QUESTIONS 1 THROUGH 7

1. List in question 1 (on page 1), the names of all the people who usually live here. Then turn to pages 2 and 3 where there are columns to list up to seven persons. In the first column print the name of one of the household members in whose name this home is owned or rented. If no household member owns or rents the living quarters, list in the first column any adult household member who is not a roomer, boarder, or paid employee. Print the names of the other household members, if any, in the columns which follow, using question 1 as a checklist.

2. Fill a circle to show how each person is related to the person in column 1.

   A stepchild or legally adopted child of the person in column 1 should be marked **Son/daughter.** Foster children or wards living in the household should be marked **Roomer, boarder.**

3. Be sure to fill a circle for the sex of each person.

4. Fill the circle for the category with which the person most closely identifies. If you fill the **Indian (American)** or **Other** circle, be sure to print the name of the specific Indian tribe or specific group.

5. Enter age at last birthday in the space provided (enter "0" for babies less than one year old). Also enter month and year of birth, *and* fill the appropriate circles. For an illustration of how to complete question 5, see the example on pages 4 and 5. If age or month or year of birth is not known, give your best estimate.

6. If the person's only marriage was annulled, mark **Never married.**

7. A person is of Spanish/Hispanic origin or descent if the person *identifies* his or her ancestry with one of the listed groups, that is, Mexican, Puerto Rican, etc. Origin or descent may be viewed as the nationality group, the lineage, or country in which the person or the person's parents or ancestors were born.

INSTRUCTIONS FOR QUESTIONS H4 THROUGH H12

H4. Mark only one circle. *This address* means the house or building number where your living quarters are located.

H5. Mark the second circle only if you *must* go through someone else's living quarters to get to your own.

H6. Consider that you have hot water even if you have it only part of the time.

Mark **Yes, but also used by another household** if someone else who lives in the same building, but is not a member of your household, also uses the facilities. Mark this circle also if the occupants of living quarters now vacant would also use the facilities in your living quarters.

H7. Count only whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, family rooms, etc. Do not count bathrooms, kitchenettes, strip or pullman kitchens, utility rooms, or unfinished attics, unfinished basements, or other space used for storage.

H8. Mark **Owned or being bought** if the living quarters are owned outright or are mortgaged. Also mark **Owned or being bought** if the living quarters are owned but the land is rented.

Mark **Rented for cash rent** if any money rent is paid. Rent may be paid by persons who are not members of your household.

Occupied without payment of cash rent includes, for example, a parsonage, military housing, a house or apartment provided free of rent by the owner, or a house or apartment occupied by a janitor or caretaker in exchange for services.

H9. A *condominium* is housing in which the apartments or houses in a development are individually owned, but the common areas, such as lobbies, halls, etc., are jointly owned. The person owning a condominium very likely has a mortgage on the particular unit.

H10b. A *commercial establishment* is easily recognized from the outside, for example, a grocery store or barber shop. A *medical office* is a doctor's or dentist's office regularly visited by patients.

H11. Include the value of the house, the land it is on, and any other structures on the same property. If the house is owned but the land is rented, estimate the combined value of the house and the land. If this is a condominium unit, enter the estimated value for your living quarters and your share of the common elements.

H12. Report the rent agreed to or contracted for, even if the rent is unpaid or paid by someone else.

If rent is not paid by the month, change the rent to a monthly amount; and then fill the appropriate circle in question H12.

If rent is paid:	Multiply rent by:
By the day	30
By the week	4
Every other week	2

If rent is paid:	Divide rent by:
4 times a year	3
2 times a year	6
Once a year	12

How to fill out your Census Form

See the filled-out example in the yellow instruction guide. This guide will help with any problems you may have.

If you need more help, call the Census Office. The telephone number of the local office is shown at the bottom of the address box on the front cover.

Use a black pencil to answer the questions. Black pencil is better to use than ballpoint or other pens.

Fill circles "O" completely, like this: ●

When you write in an answer, print or write clearly.

Make sure that answers are provided for everyone here.

See page 4 of the guide if a roomer or someone else in the household does not want to give you all the information for the form.

Answer the questions on pages 1 through 5, and then starting with pages 6 and 7, fill a pair of pages for each person in the household.

Check your answers. Then write your name, the date, and telephone number on page 20.

Mail back this form on Tuesday, April 1, or as soon afterward as you can. Use the enclosed envelope; no stamp is needed.

Please start by answering Question 1 below.

Question 1

List in Question 1

- Family members living here, including babies still in the hospital
- Relatives living here
- Lodgers or boarders living here
- Other persons living here
- College students who stay here while attending college, even if their parents live elsewhere
- Persons who usually live here but are temporarily away (including children in boarding school below the college level)
- Persons with a home elsewhere but who stay here most of the week while working

Do Not List in Question 1

- Any person away from here in the Armed Forces.
- Any college student who stays somewhere else while attending college.
- Any person who usually stays somewhere else most of the week while working there.
- Any person away from here in an institution such as a home for the aged or mental hospital.
- Any person staying or visiting here who has a usual home elsewhere.

1. What is the name of each person who was living here on Tuesday, April 1, 1980, or who was staying or visiting here and had no other home?

Note

If everyone here is staying only temporarily and has a usual home elsewhere, please mark this box ☐.

Then please:
- answer the questions on pages 2 through 5 only, and
- enter the address of your usual home on page 20.

Please continue ↗

→ ALSO ANSWER THE HOUSING QUESTIONS ON PAGE 3

Here are the QUESTIONS ↓	These are the columns for ANSWERS → Please fill one column for each person listed in Question 1.	PERSON in column 1	PERSON in column 2
		Last name First name — Middle initial	Last name First name — Middle initial
2. How is this person related to the person in column 1? *Fill one circle.* *If "Other relative" of person in column 1, give exact relationship, such as mother-in-law, niece, grandson, etc.*		*START in this column with the household member (or one of the members) in whose name the home is owned or rented. If there is no such person, start in this column with any adult household member.*	If relative of person in column 1: ○ Husband/wife ○ Father/mother ○ Son/daughter ○ Other relative → ○ Brother/sister If not related to person in column 1: ○ Roomer, boarder ○ Other nonrelative → ○ Partner, roommate ○ Paid employee
3. Sex *Fill one circle.*		○ Male ○ Female	○ Male ○ Female
4. Is this person — *Fill one circle.*		○ White ○ Asian Indian ○ Black or Negro ○ Hawaiian ○ Japanese ○ Guamanian ○ Chinese ○ Samoan ○ Filipino ○ Eskimo ○ Korean ○ Aleut ○ Vietnamese ○ Other — *Specify* ○ Indian (Amer.) *Print tribe*	○ White ○ Asian Indian ○ Black or Negro ○ Hawaiian ○ Japanese ○ Guamanian ○ Chinese ○ Samoan ○ Filipino ○ Eskimo ○ Korean ○ Aleut ○ Vietnamese ○ Other — *Specify* ○ Indian (Amer.) *Print tribe*
5. Age, and month and year of birth *a. Print age at last birthday.* *b. Print month and fill one circle.* *c. Print year in the spaces, and fill one circle below each number.*		a. Age at last birthday c. Year of birth: 1 ● 8 9 / 0 1 2 3 4 5 6 7 8 9 / 0 1 2 3 4 5 6 7 8 9 / 0 1 2 3 4 5 6 7 8 9 b. Month of birth ○ Jan.—Mar. ○ Apr.—June ○ July—Sept. ○ Oct.—Dec.	a. Is this person of Spanish/Hispanic origin or descent? *Fill one circle.*		○ No (not Spanish/Hispanic) ○ Yes, Mexican, Mexican-Amer., Chicano ○ Yes, Puerto Rican ○ Yes, Cuban ○ Yes, other Spanish/Hispanic	○ No (not Spanish/Hispanic) ○ Yes, Mexican, Mexican-Amer., Chicano ○ Yes, Puerto Rican ○ Yes, Cuban ○ Yes, other Spanish/Hispanic

NOW PLEASE ANSWER QUESTIONS H1–H12 FOR YOUR HOUSEHOLD

If you listed more than 7 persons in Question 1, please see note on page 4.

PERSON in column 7

Last name

First name — Middle initial

If relative of person in column 1:
- Husband/wife
- Father/mother
- Son/daughter
- Other relative
- Brother/sister

If not related to person in column 1:
- Roomer, boarder
- Other nonrelative
- Partner, roommate
- Paid employee

Male ■ Female

- White
- Black or Negro
- Japanese
- Chinese
- Filipino ■
- Korean
- Vietnamese
- Indian (Amer.) *Print tribe*
- Asian Indian
- Hawaiian
- Guamanian
- Samoan
- Eskimo
- Aleut
- Other – *Specify*

a. Age at last birthday

c. Year of birth: 1 8 ● 8 9 ○ 0 1 2 3 4 5 6 7 8 9

b. Month of birth
- Jan.–Mar. ■
- Apr.–June
- July–Sept.
- Oct.–Dec.

- Now married
- Separated
- Widowed
- Never married
- Divorced

- No (not Spanish/Hispanic)
- Yes, Mexican, Mexican-Amer., Chicano
- Yes, Puerto Rican
- Yes, Cuban ■
- Yes, other Spanish/Hispanic

CENSUS USE ONLY — A. ○ I ○ N ○ ○

H1. Did you leave anyone out of Question 1 because you were not sure if the person should be listed — *for example, a new baby still in the hospital, a lodger who also has another home, or a person who stays here once in a while and has no other home?*
- Yes — *On page 4 give name(s) and reason left out.*
- No

H2. Did you list anyone in Question 1 who is away from home now — *for example, on a vacation or in a hospital?*
- Yes — *On page 4 give name(s) and reason person is away.*
- No

H3. Is anyone visiting here who is not already listed?
- Yes — *On page 4 give name of each visitor for whom there is no one at the home address to report the person to a census taker.*
- No

H4. How many living quarters, occupied and vacant, are at this address?
- One
- 2 apartments or living quarters
- 3 apartments or living quarters
- 4 apartments or living quarters
- 5 apartments or living quarters
- 6 apartments or living quarters
- 7 apartments or living quarters
- 8 apartments or living quarters
- 9 apartments or living quarters
- 10 or more apartments or living quarters
- This is a mobile home or trailer

H5. Do you enter your living quarters —
- Directly from the outside or through a common or public hall?
- Through someone else's living quarters?

H6. Do you have complete plumbing facilities in your living quarters, that is, hot and cold piped water, a flush toilet, and a bathtub or shower?
- Yes, for this household only
- Yes, but also used by another household
- No, have some but not all plumbing facilities
- No plumbing facilities in living quarters

H7. How many rooms do you have in your living quarters? *Do not count bathrooms, porches, balconies, foyers, halls, or half-rooms.*
- 1 room ■
- 2 rooms
- 3 rooms
- 4 rooms
- 5 rooms
- 6 rooms
- 7 rooms
- 8 rooms
- 9 or more rooms

H8. Are your living quarters —
- Owned or being bought by you or by someone else in this household?
- Rented for cash rent?
- Occupied without payment of cash rent?

H9. Is this apartment (house) part of a condominium?
- No
- Yes, a condominium

H10. *If this is a one-family house* –

a. Is the house on a property of 10 or more acres?
- Yes ■ 1
- No

b. Is any part of the property used as a commercial establishment or medical office?
- Yes
- No

H11. *If you live in a one-family house or a condominium unit which you own or are buying* –

What is the value of this property, that is, how much do you think this property (house and lot or condominium unit) would sell for if it were for sale?

Do not answer this question if this is –
- A mobile home or trailer ■
- A house on 10 or more acres
- A house with a commercial establishment or medical office on the property

- Less than $10,000
- $10,000 to $14,999
- $15,000 to $17,499
- $17,500 to $19,999
- $20,000 to $22,499
- $22,500 to $24,999 ■
- $25,000 to $27,499
- $27,500 to $29,999
- $30,000 to $34,999
- $35,000 to $39,999
- $40,000 to $44,999
- $45,000 to $49,999
- $50,000 to $54,999
- $55,000 to $59,999
- $60,000 to $64,999
- $65,000 to $69,999
- $70,000 to $74,999
- $75,000 to $79,999
- $80,000 to $89,999
- $90,000 to $99,999
- $100,000 to $124,999
- $125,000 to $149,999
- $150,000 to $199,999
- $200,000 or more

H12. *If you pay rent for your living quarters* –

What is the monthly rent?

If rent is not paid by the month, see the instruction guide on how to figure a monthly rent.

- Less than $50
- $50 to $59
- $60 to $69
- $70 to $79
- $80 to $89
- $90 to $99 ■
- $100 to $109
- $110 to $119
- $120 to $129
- $130 to $139
- $140 to $149
- $150 to $159
- $160 to $169
- $170 to $179
- $180 to $189
- $190 to $199
- $200 to $224
- $225 to $249
- $250 to $274
- $275 to $299
- $300 to $349
- $350 to $399
- $400 to $499
- $500 or more

FOR CENSUS USE ONLY

A4. Block number

A6. Serial number

B. Type of unit or quarters
- Occupied
  - First form
  - Continuation
- Vacant
  - Regular
  - Usual home elsewhere
- Group quarters
  - First form
  - Continuation

For vacant units

C1. Is this unit for —
- Year round use
- Seasonal/Mig. — *Skip C2, C3, and D.*

C2. Vacancy status
- For rent ■
- For sale only
- Rented or sold, not occupied
- Held for occasional use
- Other vacant

C3. Is this unit boarded up?
- Yes
- No

D. Months vacant
- Less than 1 month
- 1 up to 2 months
- 2 up to 6 months
- 6 up to 12 months
- 1 year up to 2 years
- 2 or more years

E. Indicators ■
1. Mail return
2. Pop./F

F. Total persons

CORRECTION NOTE

Any corrections to the 1980 census counts of the total population and total housing units made after this report is published are available by writing to Data User Services Division, Customer Services (Corrections), Bureau of the Census, Washington, D.C. 20233.

The 1980 figures shown in this publication are subject to change pending the outcome of the various lawsuits dealing with the census counts.
